Ex.No:14

14. To capture, save and analyze network traffic on TCP/UDP/IP/HTTP/ARP/DHCP/ICMP/DNS using wireshark Tool

Aim:

To capture, save and analyze network traffic of TCP, UDP, IP, HTTP, ARP, DHCP, ICMP and DNS protocols.

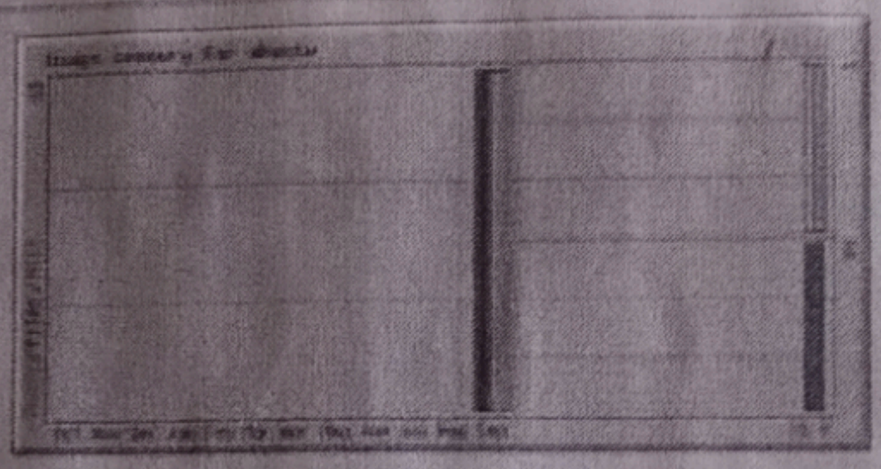

Procedure:

1. Install wireshark.
2. Open wireshark.
3. Select the network Interface.
4. Start capturing packets.
5. Generate Network Traffic.
6. Capture DNS packet.
7. Stop packet capture.
8. Save Capture file.
9. Open Saved file.
10. Analyze packet Details.

Result: Thus the implementation to capture, save & analyze the network traffic using wireshark tool has been executed successfully
